COLOR, CUT, REBUILD

One existing illustration, divided into three matching strips.

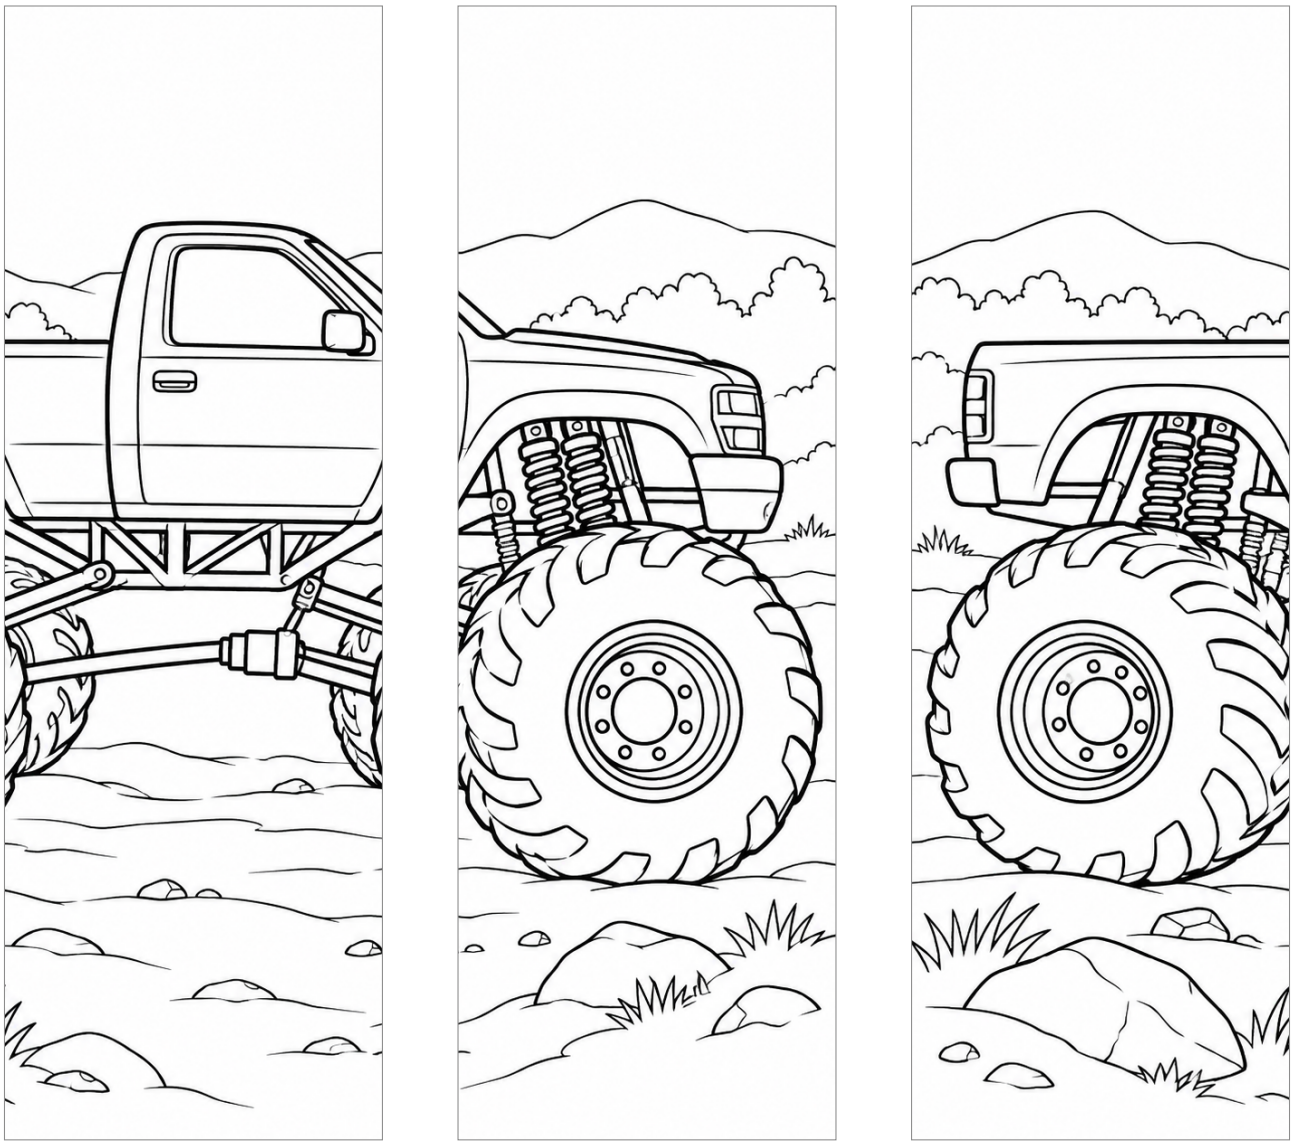

REFERENCE - Keep this page whole. Match the picture on page 2.

Print both pages single-sided on the matching paper size.
Color the strips before cutting, then arrange their outside edges together.
Cut only with suitable supervision. This is not an age-rated activity.
Digital layout checked; physical printing and classroom use not tested.

THREE STRIPS, ONE PICTURE

Color first. Cut around each thin rectangle, then rebuild the picture.

Each strip is 50 x 150 mm at actual size; assembled art is 150 x 150 mm.

Check preview and a proof. Scaling changes size, not the intended order.
